

Eleagron NEMO-X (Bio-Stimulant)

PRODUCT DESCRIPTION

NEMO-X is an aqueous extract of eco-friendly herbs, which helps plants in dealing with abiotic stresses arising due to soil pests like nematodes.

INGREDIENTS

- Asparagus officinalis.
- Badang.
- Aloe barbadensis.

FEATURES OF NEMOCURE

- Eco-friendly broad spectrum Bio-Stimulant which helps plant in dealing with abiotic stresses arising due to nematode species like:- cyst nematode, root nematode, leaf and stem nematode etc.
- Breaks the tolerance and resistance limits of nematodes to survive.
- Suitable for incorporation in IPM programs.
- No residual toxicity and phytotoxicity, so can be used until even before harvest.
- No harmful effects on mammals, humans and beneficial organisms like predatory mites, parasites, and pollinators.
- Affects the reproductive system of nematodes which prevents further population build-up of nematodes.

ADVANTAGES OF NEMOCURE

- Infected plants give equivalent fruit and yield as the healthy ones.
- First foliar Bio-stimulant which helps in fighting stress due to soil pest like nematodes.
- Purely herbal, with no residual toxicity.
- No hassles of soil fumigation or soil drenching.
- Further spread of nematodes is controlled.
- The crop is marketable even if the plant is sprayed today itself.
- Chemicals are neither used in manufacturing nor as preservative.
- Fixed dosage for every species of nematodes.
- Compatible with all pesticides and bio-stimulants.

TARGET CROP

Eggplant, Melons, Peppermint, Okra, Tomato, Cauliflower, Cabbage, Peppermint, Potato, Pomegranate, Grapes, Citrus, Apple, Peach, Plum, Banana, Mushroom, Chilies, Onion, Flowers, Other Nematode Infected Crops.

METHOD OF APPLICATION

- Nemo-x can be applied using power or knapsack sprayer.
- For best results, Nemo-x should be sprayed either before or at the first infestation of nematodes.

DOSAGE

- 5 to 6 ml /liter single spray effectively controls nematode population. In case of severe infestation repeat spray after 3 weeks or as needed.
