

Eleagron CALPHOS (FOLIAR SPRAY - Liquid Fertilizer)

Multi-functional and Universal application for Fertilizer Rich in Phosphorus, Nitrogen, and Calcium High Concentration Liquid (Foliar phosphate)

CHARACTERISTICS:

- Contains Nitrogen, Calcium and Phosphate
- In addition with Water Particle of calcium Phosphate Produce during application
- Use feed grade raw materials during synthesis no any toxicity for crops
- Does not develop any odours and free from Impurities
- Dispersing properties during application to cover wide surface area
- Easy to dilute

BENEFITS:

- First and Right Choice
- Global Approved Product and Unique Chemistry Universal Application
- Fuel for Crops ENERGY
- Farmer use one times then Huge demand Like Urea –DAP
- When DAP crisis then substitute to Use it for Maximum Yield
- Product Contain Calcium When Phosphate use always Calcium
- Deficiency This Product Gives Balance Nutrient
- Application of DAP Calcium Deficiency and more application SOIL unbalance with NUTRIENTS and Damage SOIL Fertility This Product contain balance Nutrient to Protect Soil Fertility and Maximum Yield
- Fruit Get Big Size and Shining-Red Color and no any Spot on Fruit with Application

Dose:

- For Foliar Application: Use 2 - 5 ml in 1 Litre of water.
- For Drip Irrigation: Use 1 Litre per acre.

Product Composition

Nitrogen	: 3%
Calcium	: 3%
Total Phosphate(P2O5)	: 23%
ph	: 1.1+/-1
Density	: 1.32
