

Eleagron POWERPHOS (FOLIAR SPRAY - Liquid Fertilizer)

BENEFITS TO AGRICULTURE CROPS:

- 100% water soluble phosphate the form most efficiently utilized by plants.
- Long Lasting non-leachable nitrogen- the nitrogen is in the ammonium form, which resists leaching and provides nitrogen to the plant over a longer period of time. Low volatility-form of nitrogen and Phosphorus that resists volatility.
- Nitrogen and phosphorus combination improves nutrient intake ammoniacal from of nitrogen combined with phosphorus helps the plants to utilize the phosphorus more efficiently.
- Helps uptake of micronutrients it contains polyphosphate which sequester micronutrients in solution, making them more available for plant uptake.
- Easy to handle no bags to lift, break or dispose of pumps or gravity do the work.

AMMONIUM POLYPHOSPHATE (10:34:00)

Dose:

- Foliar Application: 3-5 ml per litre water
- Drip Application: 1 ltr per acre

Product Composition

Nitrogen	: 10%
Phosphates	: 34%
Polyphosphate	: 22%
Specific Gravity	: 1.2-1.6%
pH	: 5.8-6.2
